

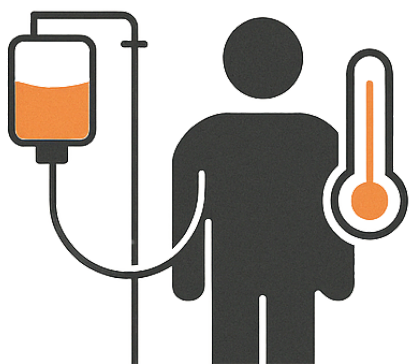

# Graphical Abstract

Impact of Filgrastim Versus Pegfilgrastim on Hospital Stay and Mortality  
Among Chemotherapy-Induced Febrile Neutropenia Patients

## AUTHORS

Minallah S, Farooqi AR, Shakeel Z, Khan A, Iqbal H, Sajjad K

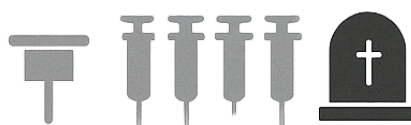

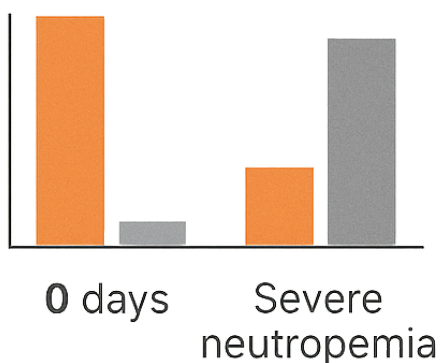

## Background

Febrile neutropenia (FN)  
Complication of  
chemotherapy  
Limited data on FN  
therapies in Pakistan

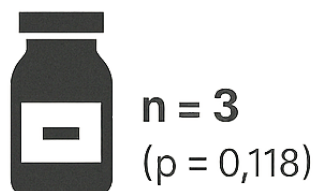

**Objective** Compare pegfilgrastim vs.  
filgrastim for chemotherapy-  
induced FN

## Method

**PEGFILGRASTIM**  
single dose

**FILGRASTIM**  
5 days

**Mortality**

**Conclusion** Pegfilgrastim reduced  
neutropenia and hospital stay  
more effectively than filgrastim
